

PicoScope® 9200 Series MATLAB® Example

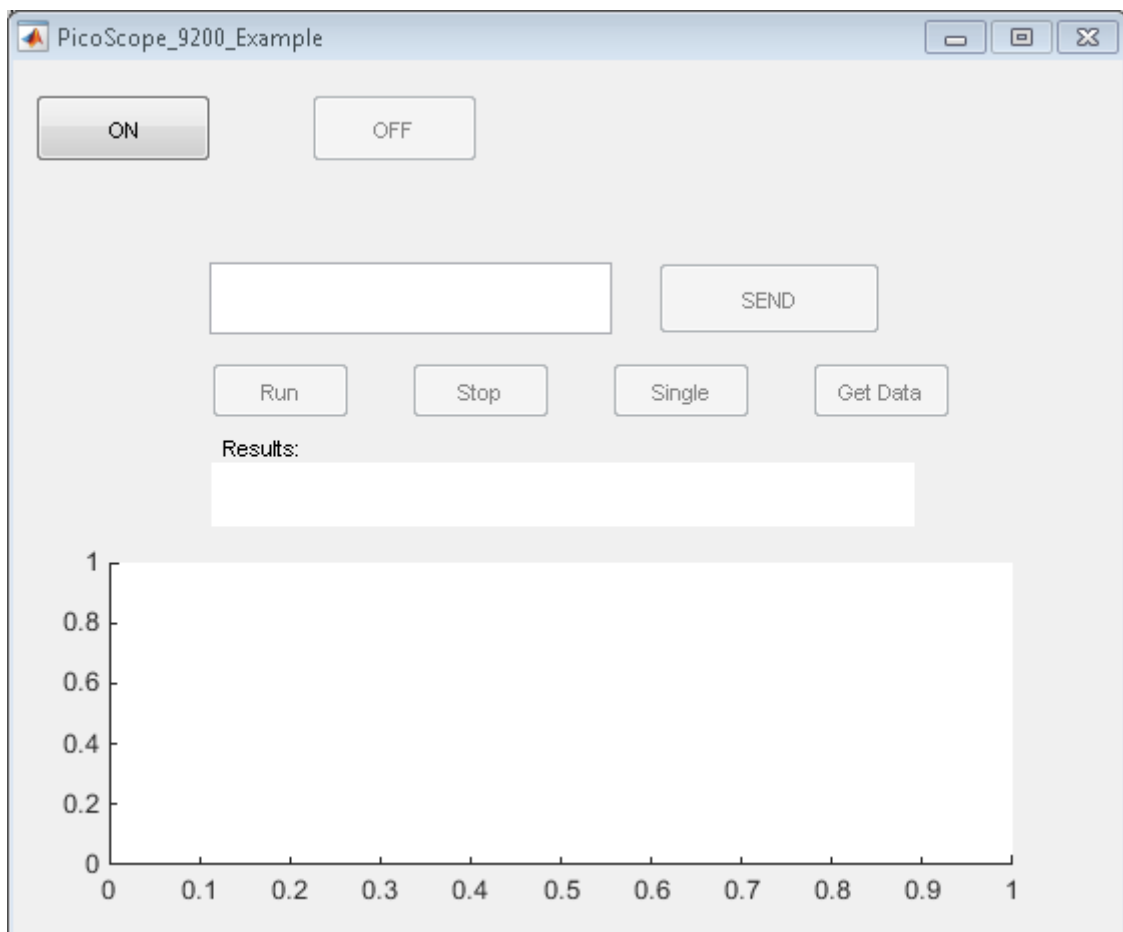

The PicoScope_9200_Example.m file is a MATLAB script. It uses ActiveX to launch the PicoScope9200 software and run a presentation.

The MATLAB is an ActiveX client, but the PicoScope9200 software is an ActiveX server.

Software Requirements:

- [MATLAB 2013a](#) or later, for Microsoft Windows platforms.
- [PicoScope 9200](#) software application

Ensure that the PicoScope_9200_Example.fig and PicoScope_9200_Example.m file are on the MATLAB path, then run the script. This will open an interface:

To run program press the button "ON". You also can send any commands from command string or press the buttons "Run", "Single", "Stop", "Get Data".

In general, information about a program's ActiveX automation server can be obtained from the program's documentation or by browsing the program's type library.
