# PicoScope® 9300 Series MATLAB® Example

The PicoScope_9300_Example.m file is a MATLAB script. It uses ActiveX to launch PicoSample 3 and run a presentation.

MATLAB is an ActiveX client, but the PicoSample 3 Software is an ActiveX server.

Software Requirements:

- MATLAB 2013a or later, for Microsoft Windows platforms.
- PicoSample 3

Ensure that the PicoScope_9300_Example.fig and PicoScope_9300_Example.m file are on the MATLAB path, then run the script. This will open an interface:

To run the program click "ON". You also can send any commands from the command string text box or click "Run", "Single", "Stop", or "Get Data".

In general, information about a program's ActiveX automation server can be obtained from the program's documentation or by browsing the program's type library.
